

A SPIRITUAL LIFE – UNDERSTANDING WHAT IT MEANS

This one-day workshop is a fascinating look at the existence of the spiritual world, how each person's spirit exists here on earth and in the spirit world.

You will also discover;

- What we are meant to learn here on earth and in the spiritual world
- About the cycle of life
- Karma-what it really means
- Free will
- What happens when the spirit enters the body at conception
- Your spiritual support whilst on earth - guides, guardian and other entities

Plus so much more...

Having gained much knowledge, you will go home feeling uplifted, with a renewed outlook on life including the meaning of your life and where you want to go moving forward.

The information and the day is suitable for people interested in personal & spiritual growth including those wanting much more from their life.

It is a higher level of learning for those wanting "more" than the basics and ready to extend their knowledge to take the next step in their journey of growth.
